

coated EPDM rubber profile

Don't give up on Color or Aesthetics!

Renko® Rubber Canada is proud to present new color-coated rubber profiles for window and door systems. These specially coated seals are produced with a traditional black compound and coated with an extra colored layer, while maintaining all the characteristics of EPDM rubber.

Depending on your aesthetic requirements, you can choose either half or full coatings!

THE ADVANTAGES:

- ◇ High endurance / resistance against indoor and outdoor conditions
- ◇ Has a more aesthetically appealing look when compared to traditional black seals
- ◇ More options to choose from, as these coatings can be manufactured in numerous colors
- ◇ Easy to clean, and leaves no color stains!
- ◇ Provides the dynamics of black gaskets and the look of colors, while keeping all the characteristics of EPDM rubber.
